About Our Authors 32, 60, 80
Abrus precatorius 43
Absinth 36
Acer 50
Aceraceae 51
Acer negundo 51
Acromyrmex octinosporus 68
Acronychis baueri 52
Acronycine 52
Addis Ababa Spice Market, illus .. 33
Aedes canadensis canadensis 21
Aedes cinereus 22
Aedes communis 21, 23
Aedes excrucians 22
Aedes nigripes 22
Aedes punctor 22
Aedes sp., illus 17, 22, 23
Aedes vexans 22
Agaricus bisporus 55
Agaricus disseminatus 71
Agricultural Research Service—
Longwood Woody Plant Exploration
Program 5-11
Ajo 24
Alkaloids 36, 46, 49, 52, 53
Allison, Patricia 67-69, 71-75, 80
Amaryllis 19
Antitiumor Agents, the Search for
Plant Sources of 35-53
Antitumor AGents, the Search for
Among the Higher Fungi 54-58
Apocynaceae 49, 51, 53
Arboretum Activities 18, 32, 34,
59, 62, 76
Ardisia japonica 6-7
Ardisia japonica, illus. 5
ARS-Longwood Plant Exploration
Program in Woody Plant
Improvement 5-11
Asclepiadaceae 53
Azaleas 7-11
Azaleas, Kurume, illus. 11
Barley 36
Basidiomycetes 54-58
Basidiomycete cultures, illus. 55
Basidiomycete sample removal,
illus. 54
Basidiomycete, sporophores,
illus. 54
Bee, gold pendant, illus. 66
Begoniaceae 50
Bignoniaceae 52
Boletus 56
Boletus edulis 55
Bonga Road, Ethiopia, illus. 35
Braun, E. Lucy 3-4
Buckeye 4
Bufadienolides 50
Bursera 50
Cabbage 26
Cacti 24
Caesalpinia gilliesii 50, 51
Calvacin 56, 58
Calvatia 56
Calvatia gigantea 56
Camellia 5
Camellia japonica 8
Camellia japonica, illus. 9
Camptotheca acuminata .. 46, 48, 52
Camptothecin 48, 52
Carcinoma 755 58
Carcinoma, Walker-256 (WM) .. 42, 50
Cardenolides 50
Cattleya 19
Cell Culture, (KB) 42, 43, 49,
50, 53, 58
Cell, Plant, diagram 27
Cell, Plant, Plasmolyzed, diagram . 30
Cephaelis ipecacuanha 52
Cephalotaxaceae 51
Cephalotaxus 53
Cephalotaxus harringtonia 46, 51
Chestnut 4
Chuparosa 24
Clinical Evaluation, lists 52
Compositae 50, 53
Coprinus 71, 73
Coprinus angulatus 73
Coprinus boudieri 73
Coprinus galericuliformis 74
Coprinus plicatilis 74, 75
Coprinus plicatilis microsporus ... 74
Coprinus sphaerosporus 58
Coprinus sphaerosporus, pH-Oxygen ..
Studies, curve 58
Coprinus subdisseminatus 75
Coriander 36
Cornaceae 53
Cornus kousa, illus. 11
Corylopsis sinensis 12-13
Costanza, Joseph, illus. 3
Costus 20
Creech, John L. 5-11
Crotepoxide 50
Croton macrostachys 50
Cruciferae 50

Zingiberaceae 20

About Our Authors

Donald Iffland, M.S., Pennsylvania, is a faculty member at Harcum College and a leader in the educational programs at the Tyler Arboretum. In recent years he has become noted for his photographic grasp of fleeting aspects of plant life.

Kent H. McKnight, Ph. D. Michigan, is Research Mycologist with the Crops Research Division, United States Department of Agriculture. Although he is based at Beltsville, he is an expert on the taxonomy and ecology of the mushrooms of the central Rockies. His co-author, *Patricia Allison*, was Visiting Professor at the University of Guayaquil, Ecuador, when she made the collections of which material yielding one of the new species was a part.

Frank S. Santamour, Jr., Ph. D., Minnesota, is no stranger to readers of the *Bulletin*. As Geneticist at the Morris Arboretum he made a number of contributions to the literature about the cytology and chemotaxonomy of woody plants. He is now Research Geneticist at the U.S. National Arboretum, Washington, D.C., leading a project concerned with developing superior shade and ornamental trees that can tolerate the stress factors of the urban environment and thus be used in city planting.
